

abox

survey design manufacture delivery install

storagewall and office / commercial storage.

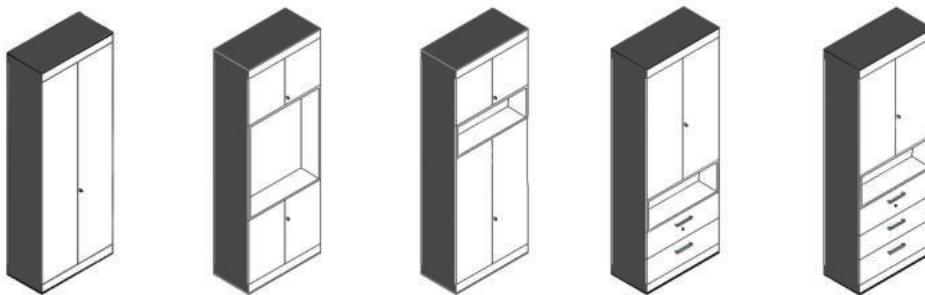

Abox are passionate about storage with Storage wall being our flagship product. Designing storage wall begins by surveying your premises, preparing drawings, which after approval are manufactured here in the UK. Delivery and installation are carried out by our team of installers. The design of our wall backing or room dividing storage wall and desking will increase your workplace storage capacity to create a functional and pleasing office environment. Our Abox team will be happy to guide /advise you from conception to finished installation.

apex

APEX Storage Wall is a high specification system, suitable for all sectors and is good value for money.

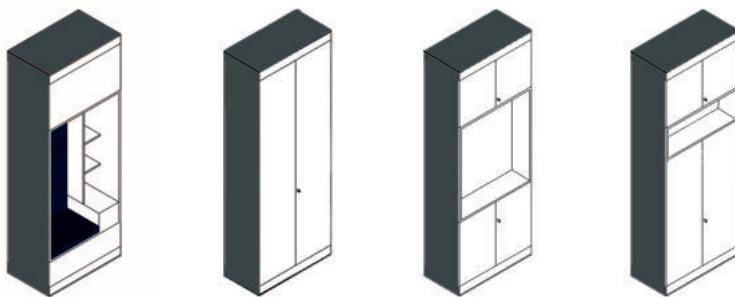

Floor to ceiling or full height units can be wall backing or room dividing to create divisions within their environment, reducing noise levels.

grid

The workplace has changed dramatically in recent times and personal storage lockers are increasingly used with shared / hot desking offering a safe and secure storage facility.

A range of modular sizes and finishes are available with standard key or electronic entry locks.

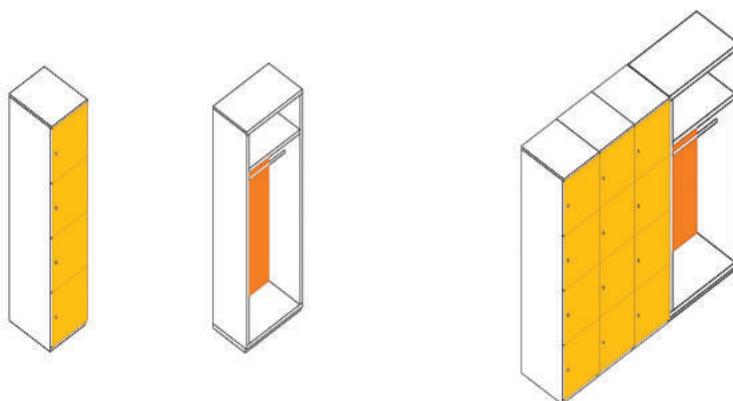

Our lockers can be integrated with seating or recycling units.

noox

NOOX modules have fixed height shelving from 1 - 5 levels, available in 2 widths. Modules are stacked to your desired height and capacity need.

Upholstered seating and media screen modules complement the NOOX range.

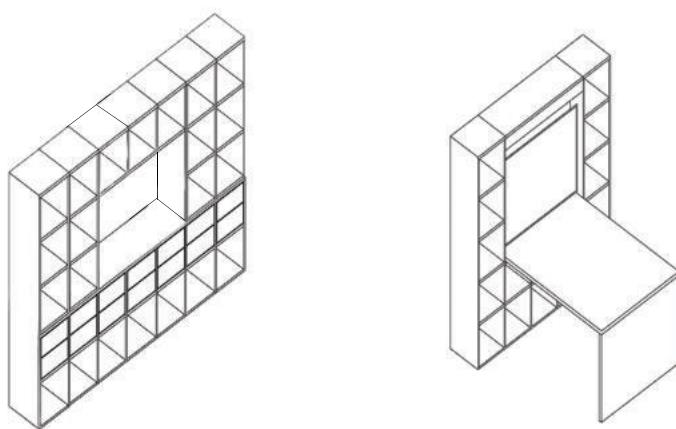

Easy Fit Accessories (EFA's) are available to tailor all NOOX modules to suit your needs from doors, drawers, flaps to pigeonholes, lockers and even wine racks are available.

envy

Our ENVY display and storage system can be used as a functional room partition.

The flexible display can be modified to include doors, drawers, acoustic panels or refreshment / tea point option.

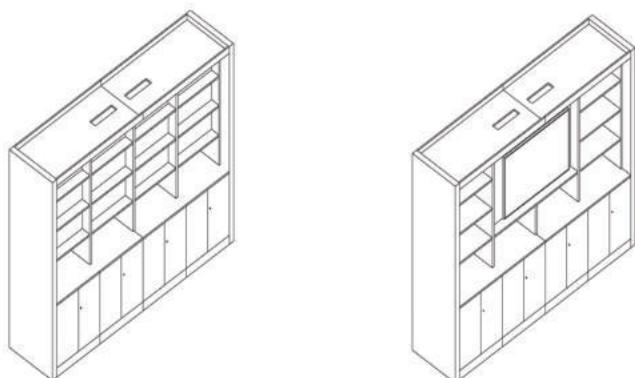

ENVY allows a room to be divided into zones without a set partition.

tier

A highly configurable modular shelving system based around a metal grid frame. Using a small number of standard components TIER can be designed to organise and divide the ever evolving workspace.

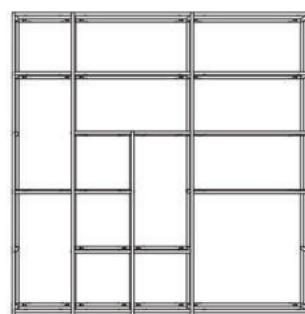

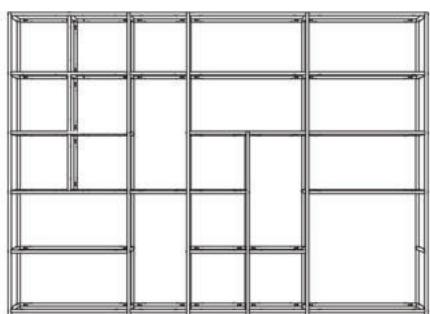

TIER can be configured to increase storage or as a divider in an open office. With employees now having more flexibility as to where they work, this movable zone dividing storage system can create both visual and sound barriers.
